SUMMARY

Aspiring Business Analyst with hands-on experience in requirements gathering, stakeholder management, and translating business needs into data-driven reporting solutions. Skilled in defining KPIs, documenting business rules, and collaborating with cross-functional stakeholders to design SQL-backed reporting structures and Power BI dashboards that improve decision-making. Experienced in process improvement, data validation, and communicating complex analytical findings clearly to non-technical audiences, with strong supporting skills in SQL, Power BI, and Excel.

SKILLS

Business Analysis:	Business Analysis, Requirements Gathering, Stakeholder Management, Process Improvement, Documentation, Business Rule Verification, Communication
Reporting & BI:	Power BI, DAX, Dashboard Development, KPI Reporting, Ad-hoc Reporting, Data Visualization
Data & Databases:	SQL, MySQL, Relational Databases, Star Schema, Data Validation, Data Cleaning
Data Analysis:	Data Analysis, Exploratory Data Analysis, Trend Analysis, Statistical Analysis
ETL & Data Engineering:	Pentaho Spoon, ETL Pipelines, Data Transformation
Programming:	Python, SQL
Tools:	Microsoft Excel, Git, Jupyter Notebook
Relevant Coursework:	DBMS, Statistics, Machine Learning, Data Structures and Algorithms

EXPERIENCE

Business Analyst Intern — Decode Data Academy	<i>July 2025 – Present</i>
– Collaborated with stakeholders to gather business and reporting requirements, define KPIs, and translate business questions into interactive dashboards supporting data-driven decision making. – Performed data validation, quality assurance, and business rule verification throughout the reporting pipeline to ensure consistency, accuracy, and reliability of outputs delivered to stakeholders. – Documented and designed normalized relational databases, SQL views, and star-schema data models to support scalable, accurate business reporting. – Analyzed 10,000+ student records using MySQL and SQL to identify data quality issues, eliminating over 95% of inconsistencies and improving reporting reliability for business stakeholders. – Partnered with cross-functional stakeholders to design and deliver six interactive Power BI dashboards analyzing student performance, contest participation, and learning outcomes. – Identified process inefficiencies and automated SQL-based reporting workflows, reducing manual reporting effort and improving turnaround time for business stakeholders.	

PROJECTS

Student Performance & Contest Analytics Dashboard (<i>Internship</i>) Power BI SQL	 Live Dashboard
– Partnered with stakeholders to gather requirements and built an end-to-end business reporting solution integrating 5+ student datasets using MySQL, SQL, and Power BI to track performance trends, rankings, and learning outcomes. – Defined KPIs and developed SQL transformations, DAX measures, drill-through reports, and dynamic slicers to automate reporting, improve decision accuracy, and enable stakeholders to monitor performance across multiple dimensions.	
Flight Data Engineering Pipeline Pentaho Spoon MySQL Power BI	 Live Dashboard
– Addressed the business need for reliable operational reporting by designing and implementing an end-to-end ETL pipeline using Pentaho Spoon and MySQL, transforming 445K+ flight records into an analytics-ready dataset. – Built SQL views, applied star-schema data modeling, and developed interactive Power BI dashboards with KPI reporting to support business decisions on airline delays, airport performance, and carrier efficiency. – Improved reporting turnaround by optimizing data transformation workflows and integrating ETL processes with SQL-based analytical models for business intelligence use.	
Banking Risk Analytics & Loan Default Analysis Python Pandas NumPy Matplotlib Seaborn	 GitHub
– Addressed a business need for improved credit risk assessment by conducting exploratory data analysis on banking loan application datasets, performing data cleaning, missing value treatment, and customer risk segmentation. – Developed business-driven visualizations and KPIs to analyze loan defaults, repayment behavior, employment stability, income segmentation, EMI burden, and credit affordability, generating actionable insights for business stakeholders. – Engineered business-focused analytical features including income segmentation, credit ratio, and EMI burden metrics to support customer risk profiling and financial decision-making.	

EDUCATION

Bachelor of Technology (B.Tech.) in Artificial Intelligence and Data Science Lakshmi Narain College of Technology, Bhopal (M.P.)	2022 – 2026
