SUMMARY

Aspiring Business Intelligence Analyst with hands-on experience building BI reporting solutions using SQL, Power BI, and DAX, translating raw data into actionable business insights. Skilled in designing star-schema data models, developing KPI-driven dashboards, and performing trend analysis to support strategic decision-making. Experienced in end-to-end BI delivery — from SQL-based data preparation to interactive dashboard design — with a track record of transforming 450K+ records into reporting solutions that improve business visibility and decision accuracy.

SKILLS

Business Intelligence:	Business Intelligence, Power BI, DAX, Power Query, Dashboard Design, KPI Development, Data Visualization, Drill-Through Analysis
Data Modeling:	Data Modeling, Star Schema, Fact & Dimension Modeling, Relationships, Data Warehousing
SQL & Databases:	SQL, MySQL, Views, Joins, Relational Databases, Query Optimization
Data Analysis:	Trend Analysis, Exploratory Data Analysis, Statistical Analysis, Business Insights
ETL & Data Engineering:	Pentaho Spoon, ETL Pipelines, Data Cleaning, Data Transformation, Data Validation
Programming:	Python, SQL, DAX
Tools:	Microsoft Excel, Git, Jupyter Notebook
Relevant Coursework:	DBMS, Statistics, Machine Learning, Data Structures and Algorithms

EXPERIENCE

Business Intelligence Analyst Intern — Decode Data Academy	<i>July 2025 – Present</i>
- Developed six interactive Power BI dashboards using SQL, DAX, drill-through navigation, and KPI-driven visualizations, delivering business insights on student performance, contest participation, and learning outcomes. - Designed star-schema data models, SQL views, and normalized relational databases to support scalable, high-performance BI reporting and trend analysis. - Cleaned, transformed, and validated 10,000+ student records using MySQL and advanced SQL queries, improving data quality by eliminating over 95% of inconsistencies to ensure reliable BI reporting. - Automated SQL-based transformation and reporting workflows, reducing manual reporting effort while improving reporting accuracy and turnaround time. - Collaborated with stakeholders to gather reporting requirements, define KPIs, and deliver BI dashboards that supported data-driven business decisions. - Performed data validation and business rule verification throughout the BI reporting pipeline to ensure consistency, accuracy, and reliability of insights.	

PROJECTS

Student Performance & Contest Analytics Dashboard (<i>Internship</i>) Power BI SQL	 Live Dashboard
- Built an end-to-end business intelligence solution integrating 5+ student datasets using MySQL, SQL, and Power BI to analyze contest participation, performance trends, rankings, and learning outcomes through KPI-driven dashboards. - Developed SQL transformations, DAX measures, drill-through reports, and dynamic slicers to automate reporting, improve analytical accuracy, and enable stakeholders to monitor performance across multiple dimensions.	
Flight Data Engineering Pipeline Pentaho Spoon MySQL Power BI	 Live Dashboard
- Designed and implemented an end-to-end ETL pipeline using Pentaho Spoon and MySQL to ingest, cleanse, validate, and transform 445K+ flight records into a BI-ready dataset for business reporting. - Built SQL views, applied star-schema data modeling, and developed interactive Power BI dashboards with KPI reporting and drill-down analysis to evaluate airline delays, airport performance, carrier efficiency, and operational trends. - Optimized data transformation workflows by integrating ETL processes with SQL-based analytical models, improving dataset readiness for business intelligence and dashboard reporting.	
Banking Risk Analytics & Loan Default Analysis Python Pandas NumPy Matplotlib Seaborn	GitHub
- Conducted exploratory data analysis on banking datasets containing current and historical loan applications by performing data cleaning, missing value treatment, feature engineering, correlation analysis, and customer risk segmentation. - Developed business-driven visualizations and KPIs to analyze loan defaults, repayment behavior, employment stability, income segmentation, EMI burden, and credit affordability, generating actionable insights for credit risk assessment. - Engineered business-focused analytical features including income segmentation, credit ratio, employment duration groups, and EMI burden metrics to enhance customer risk profiling and financial decision-making.	

EDUCATION

Bachelor of Technology (B.Tech.) in Artificial Intelligence and Data Science Lakshmi Narain College of Technology, Bhopal (M.P.)	2022 – 2026
--	-------------

CERTIFICATIONS

AWS Academy Data Engineering Badge	Dec 2025
Wipro TalentNext Database Solutions Expert	Oct 2024
