## SUMMARY

Aspiring MIS Executive with hands-on experience in MIS reporting, data validation, and report automation using Advanced Excel, SQL, and Power BI. Skilled in building accurate, timely business reports, automating recurring reporting workflows, and validating data integrity across large datasets to support management decision-making. Experienced in designing SQL-backed reporting structures and interactive dashboards, with a strong focus on reducing manual effort, improving reporting turnaround time, and ensuring data accuracy across 450K+ records.

## SKILLS

|                                    |                                                                                                           |
|------------------------------------|-----------------------------------------------------------------------------------------------------------|
| <b>MIS &amp; Reporting:</b>        | MIS Reporting, Report Automation, Business Reporting, Ad-hoc Reporting, Reporting Turnaround Optimization |
| <b>Excel:</b>                      | Microsoft Excel, Advanced Excel                                                                           |
| <b>Data Validation:</b>            | Data Validation, Data Cleaning, Data Accuracy, Data Reconciliation, Business Rule Verification            |
| <b>SQL &amp; Databases:</b>        | SQL, MySQL, Views, Joins, Relational Databases, Query Optimization                                        |
| <b>Business Intelligence:</b>      | Power BI, DAX, Dashboarding, KPI Reporting, Data Visualization                                            |
| <b>ETL &amp; Data Engineering:</b> | Pentaho Spoon, ETL Pipelines, Data Transformation                                                         |
| <b>Programming:</b>                | Python, SQL                                                                                               |
| <b>Tools:</b>                      | Git, Jupyter Notebook                                                                                     |
| <b>Relevant Coursework:</b>        | DBMS, Statistics, Machine Learning, Data Structures and Algorithms                                        |

## EXPERIENCE

### MIS Executive Intern — Decode Data Academy July 2025 – Present

- Automated SQL-based MIS reporting workflows, reducing manual reporting effort while improving reporting accuracy and turnaround time for stakeholders.
- Cleaned, validated, and reconciled 10,000+ student records using MySQL and advanced SQL queries, eliminating over 95% of data inconsistencies to ensure reliable MIS reports.
- Performed data validation, quality assurance, and business rule verification throughout the reporting pipeline to maintain data accuracy and consistency across reports.
- Designed normalized relational databases, SQL views, and star-schema data models to support scalable, dependable MIS and business reporting.
- Built six interactive Power BI dashboards using SQL and DAX to deliver management-ready reports on student performance, contest participation, and learning outcomes.
- Collaborated with stakeholders to gather reporting requirements, define KPIs, and deliver accurate, timely MIS reports supporting data-driven decision making.

## PROJECTS

### Flight Data Engineering Pipeline | Pentaho Spoon | MySQL | Power BI [Live Dashboard](#)

- Designed and implemented an end-to-end ETL and reporting pipeline using Pentaho Spoon and MySQL to ingest, cleanse, validate, and transform 445K+ flight records into a report-ready dataset, improving data reliability for business reporting.
- Built SQL views, applied star-schema data modeling, and developed interactive Power BI dashboards with KPI reporting to evaluate airline delays, airport performance, carrier efficiency, and operational trends.
- Optimized data transformation workflows by integrating ETL processes with SQL-based reporting models, reducing manual reporting effort and improving report turnaround time.

### Student Performance & Contest Analytics Dashboard (Internship) | Power BI | SQL [Live Dashboard](#)

- Built an end-to-end MIS reporting solution integrating 5+ student datasets using MySQL, SQL, and Power BI to track contest participation, performance trends, rankings, and learning outcomes through automated, KPI-driven reports.
- Developed SQL transformations, DAX measures, drill-through reports, and dynamic slicers to automate reporting, reduce manual effort, and improve report accuracy for stakeholder review.

### Banking Risk Analytics & Loan Default Analysis | Python | Pandas | NumPy | Matplotlib | Seaborn [GitHub](#)

- Conducted exploratory data analysis on banking datasets containing current and historical loan applications by performing data cleaning, missing value treatment, feature engineering, correlation analysis, and customer risk segmentation.
- Developed business-driven visualizations and KPIs to analyze loan defaults, repayment behavior, employment stability, income segmentation, EMI burden, and credit affordability, generating actionable reporting insights.
- Engineered business-focused analytical features including income segmentation, credit ratio, employment duration groups, and EMI burden metrics to enhance customer risk profiling and reporting accuracy.

## EDUCATION

### Bachelor of Technology (B.Tech.) in Artificial Intelligence and Data Science

Lakshmi Narain College of Technology, Bhopal (M.P.)

2022 – 2026

## CERTIFICATIONS

AWS Academy Data Engineering Badge

Dec 2025

Wipro TalentNext Database Solutions Expert

Oct 2024
