SUMMARY

Data Analytics and Business Intelligence professional with hands-on experience across SQL, Python, Power BI, DAX, MySQL, and ETL pipelines. Proven ability to design relational databases and star-schema data models, automate MIS and business reporting workflows, and build KPI-driven dashboards that turn 450K+ raw records into actionable insights. Skilled in data cleaning, exploratory data analysis, requirement gathering, stakeholder communication, and translating business needs into data-driven reporting solutions across Data Analyst, Business Analyst, SQL Developer, MIS, and BI Developer functions.

SKILLS

Programming:	SQL, Python, DAX
Query & Database Skills:	MySQL, Joins, Views, Stored Procedures, Query Optimization, Relational Databases, Star Schema, Fact & Dimension Modeling, Data Warehousing
Business Intelligence:	Power BI, Power Query, Dashboard Development, KPI Reporting, Data Visualization, Ad-hoc Reporting, Drill-Through Analysis
MIS & Reporting:	MIS Reporting, Report Automation, Data Validation, Business Rule Verification, Process Automation
ETL & Data Engineering:	Pentaho Spoon, ETL Pipelines, Data Cleaning, Data Transformation, Data Integration
Analytics & Business Analysis:	Exploratory Data Analysis, Statistical Analysis, Trend Analysis, Business Analysis, Requirement Gathering, Stakeholder Management, Documentation
Libraries:	Pandas, NumPy, Matplotlib, Seaborn
Tools:	Microsoft Excel, Git, Jupyter Notebook
Relevant Coursework:	DBMS, Statistics, Machine Learning, Data Structures and Algorithms

EXPERIENCE

Data Analytics Intern — Decode Data Academy	<i>July 2025 – Present</i>
- Cleaned, transformed, and validated 10,000+ student records using MySQL and advanced SQL queries, improving data quality by eliminating over 95% of inconsistencies for reliable analytical and MIS reporting. - Designed normalized relational databases, SQL views, and star-schema data models to support scalable business intelligence reporting, MIS dashboards, and high-performance analytical queries. - Developed six interactive Power BI dashboards using SQL, DAX, drill-through navigation, and KPI-driven visualizations to analyze student performance, contest participation, and learning outcomes. - Automated SQL-based transformation and MIS reporting workflows, reducing manual reporting effort while improving reporting accuracy and turnaround time. - Collaborated with stakeholders to gather business and reporting requirements, define KPIs, and deliver interactive dashboards supporting data-driven decision making. - Performed data validation, quality assurance, and business rule verification throughout the reporting pipeline to ensure consistency, accuracy, and reliability of analytical outputs.	

PROJECTS

Flight Data Engineering Pipeline Pentaho Spoon MySQL Power BI	Live Dashboard
- Designed and implemented an end-to-end ETL pipeline using Pentaho Spoon and MySQL to ingest, cleanse, validate, and transform 445K+ flight records into an analytics-ready dataset for business reporting. - Built SQL views, applied star-schema data modeling, and developed interactive Power BI dashboards with KPI reporting and drill-down analysis to evaluate airline delays, airport performance, carrier efficiency, and operational trends. - Optimized data transformation workflows by integrating ETL processes with SQL-based analytical models, improving dataset readiness for business intelligence and dashboard reporting.	
Banking Risk Analytics & Loan Default Analysis Python Pandas NumPy Matplotlib Seaborn	GitHub
- Conducted exploratory data analysis on banking datasets containing current and historical loan applications by performing data cleaning, missing value treatment, feature engineering, correlation analysis, and customer risk segmentation. - Developed business-driven visualizations and KPIs to analyze loan defaults, repayment behavior, employment stability, income segmentation, EMI burden, and credit affordability, generating actionable insights for credit risk assessment. - Engineered business-focused analytical features including income segmentation, credit ratio, employment duration groups, and EMI burden metrics to enhance customer risk profiling and financial decision-making.	
Student Performance & Contest Analytics Dashboard (<i>Internship</i>) Power BI SQL	Live Dashboard
- Built an end-to-end business intelligence solution integrating 5+ student datasets using MySQL, SQL, and Power BI to analyze contest participation, performance trends, rankings, and learning outcomes through KPI-driven dashboards. - Developed SQL transformations, DAX measures, drill-through reports, and dynamic slicers to automate reporting, improve analytical accuracy, and enable stakeholders to monitor performance across multiple dimensions.	

EDUCATION

Bachelor of Technology (B.Tech.) in Artificial Intelligence and Data Science
Lakshmi Narain College of Technology, Bhopal (M.P.)

2022 – 2026

CERTIFICATIONS

AWS Academy Data Engineering Badge

Dec 2025

Wipro TalentNext Database Solutions Expert

Oct 2024
