SUMMARY

Aspiring Data Analyst with hands-on experience designing end-to-end analytics solutions using SQL, Python, Power BI, DAX, MySQL, and ETL pipelines. Experienced in building KPI-driven dashboards, developing star-schema data models, performing exploratory data analysis, and transforming 450K+ records into business insights. Skilled in data cleaning, business intelligence reporting, stakeholder requirement gathering, and translating complex datasets into actionable business recommendations.

SKILLS

Programming:	SQL, Python, DAX
Business Intelligence:	Power BI, Dashboard Development, KPI Reporting, Data Visualization, Ad-hoc Reporting
Databases:	MySQL, Relational Databases, Star Schema, Fact & Dimension Modeling, Data Warehousing
ETL & Data Engineering:	Pentaho Spoon, ETL Pipelines, Data Cleaning, Data Transformation, Data Validation
Analytics:	Exploratory Data Analysis, Statistical Analysis, Trend Analysis, Business Intelligence, Requirement Gathering, Stakeholder Management
Libraries:	Pandas, NumPy, Matplotlib, Seaborn
Tools:	Microsoft Excel, Git, Jupyter Notebook
Relevant Coursework:	DBMS, Statistics, Machine Learning, Data Structures and Algorithms

EXPERIENCE

Data Analytics Intern — Decode Data Academy	<i>Jan 2026 – Present</i>
– Cleaned, transformed, and validated 10,000+ student records using MySQL and advanced SQL queries, improving data quality by eliminating over 95% of inconsistencies for reliable analytical reporting. – Designed normalized relational databases, SQL views, and star-schema data models to support scalable business intelligence reporting and high-performance analytical queries. – Developed six interactive Power BI dashboards using SQL, DAX, drill-through navigation, and KPI-driven visualizations to analyze student performance, contest participation, and learning outcomes. – Automated SQL-based transformation and reporting workflows, reducing manual reporting effort while improving reporting accuracy and turnaround time. – Collaborated with stakeholders to gather reporting requirements, define KPIs, and deliver interactive dashboards supporting data-driven decision making. – Performed data validation, quality assurance, and business rule verification throughout the reporting pipeline to ensure consistency, accuracy, and reliability of analytical outputs.	

PROJECTS

Flight Data Engineering Pipeline Pentaho Spoon MySQL Power BI	GitHub
– Designed and implemented an end-to-end ETL pipeline using Pentaho Spoon and MySQL to ingest, cleanse, validate, and transform 445K+ flight records into an analytics-ready dataset for business reporting. – Built SQL views, applied star-schema data modeling, and developed interactive Power BI dashboards with KPI reporting and drill-down analysis to evaluate airline delays, airport performance, carrier efficiency, and operational trends. – Optimized data transformation workflows by integrating ETL processes with SQL-based analytical models, improving dataset readiness for business intelligence and dashboard reporting.	
Banking Risk Analytics & Loan Default Analysis Python Pandas NumPy Matplotlib Seaborn	GitHub
– Conducted exploratory data analysis on banking datasets containing current and historical loan applications by performing data cleaning, missing value treatment, feature engineering, correlation analysis, and customer risk segmentation. – Developed business-driven visualizations and KPIs to analyze loan defaults, repayment behavior, employment stability, income segmentation, EMI burden, and credit affordability, generating actionable insights for credit risk assessment. – Engineered business-focused analytical features including income segmentation, credit ratio, employment duration groups, and EMI burden metrics to enhance customer risk profiling and financial decision-making.	
Student Performance & Contest Analytics Dashboard (<i>Internship</i>) MySQL Power BI SQL DAX	
– Built an end-to-end business intelligence solution integrating 5+ student datasets using MySQL, SQL, and Power BI to analyze contest participation, performance trends, rankings, and learning outcomes through KPI-driven dashboards. – Developed SQL transformations, DAX measures, drill-through reports, and dynamic slicers to automate reporting, improve analytical accuracy, and enable stakeholders to monitor performance across multiple dimensions.	

EDUCATION

Bachelor of Technology (B.Tech.) in Artificial Intelligence and Data Science	
Lakshmi Narain College of Technology, Bhopal (M.P.)	2022 – 2026

CERTIFICATIONS

AWS Academy Data Engineering Badge	Dec 2025
Wipro TalentNext Database Solutions Expert	Oct 2024
