SUMMARY

Aspiring Power BI Developer with hands-on experience designing interactive dashboards, DAX measures, and data models to support KPI-driven business intelligence reporting. Skilled in Power Query, star-schema data modeling, drill-through navigation, and building relationships between fact and dimension tables to deliver scalable, high-performance dashboards. Experienced in SQL-based data preparation and ETL pipelines, with a track record of transforming 450K+ raw records into interactive dashboards that drive data-informed business decisions.

SKILLS

Power BI:	Power BI, DAX, Power Query, Dashboard Design, KPI Reporting, Drill-Through Analysis, Dynamic Slicers, Report Automation
Data Modeling:	Data Modeling, Relationships, Star Schema, Fact & Dimension Modeling, Data Warehousing
SQL & Databases:	SQL, MySQL, Views, Joins, Relational Databases, Query Optimization
ETL & Data Engineering:	Pentaho Spoon, ETL Pipelines, Data Cleaning, Data Transformation, Data Validation
Business Intelligence:	Business Intelligence, Data Visualization, Ad-hoc Reporting, Stakeholder Reporting
Programming:	Python, SQL, DAX
Tools:	Microsoft Excel, Git, Jupyter Notebook
Relevant Coursework:	DBMS, Statistics, Machine Learning, Data Structures and Algorithms

EXPERIENCE

Power BI Developer Intern — Decode Data Academy	<i>July 2025 – Present</i>
– Developed six interactive Power BI dashboards using DAX measures, Power Query transformations, drill-through navigation, and KPI-driven visualizations to analyze student performance, contest participation, and learning outcomes. – Designed star-schema data models with defined table relationships, SQL views, and normalized relational databases to support scalable, high-performance dashboard reporting. – Built DAX calculations and dynamic slicers to automate reporting workflows, reducing manual reporting effort while improving report accuracy and turnaround time. – Cleaned, transformed, and validated 10,000+ student records using MySQL and SQL to ensure reliable, dashboard-ready data, eliminating over 95% of inconsistencies. – Collaborated with stakeholders to gather reporting requirements, define KPIs, and deliver interactive Power BI dashboards supporting data-driven decision making. – Performed data validation and quality assurance throughout the reporting pipeline to ensure consistency and accuracy of dashboard outputs.	

PROJECTS

Student Performance & Contest Analytics Dashboard (<i>Internship</i>) Power BI SQL	 Live Dashboard
– Built an end-to-end Power BI business intelligence solution integrating 5+ student datasets using MySQL, SQL, and DAX to analyze contest participation, performance trends, rankings, and learning outcomes through KPI-driven dashboards. – Developed DAX measures, drill-through reports, dynamic slicers, and SQL transformations to automate reporting, improve analytical accuracy, and enable stakeholders to monitor performance across multiple dimensions.	
Flight Data Engineering Pipeline Pentaho Spoon MySQL Power BI	 Live Dashboard
– Designed and implemented an end-to-end ETL pipeline using Pentaho Spoon and MySQL to ingest, cleanse, validate, and transform 445K+ flight records into an analytics-ready dataset for Power BI reporting. – Built SQL views, applied star-schema data modeling with defined table relationships, and developed interactive Power BI dashboards with KPI reporting and drill-down analysis to evaluate airline delays, airport performance, carrier efficiency, and operational trends. – Optimized data transformation workflows by integrating ETL processes with SQL-based analytical models, improving dataset readiness for Power BI dashboard reporting.	
Banking Risk Analytics & Loan Default Analysis Python Pandas NumPy Matplotlib Seaborn	 GitHub
– Conducted exploratory data analysis on banking datasets containing current and historical loan applications by performing data cleaning, missing value treatment, feature engineering, correlation analysis, and customer risk segmentation. – Developed business-driven visualizations and KPIs to analyze loan defaults, repayment behavior, employment stability, income segmentation, EMI burden, and credit affordability, generating actionable insights for credit risk assessment. – Engineered business-focused analytical features including income segmentation, credit ratio, employment duration groups, and EMI burden metrics to enhance customer risk profiling and financial decision-making.	

EDUCATION

Bachelor of Technology (B.Tech.) in Artificial Intelligence and Data Science
Lakshmi Narain College of Technology, Bhopal (M.P.)

2022 – 2026

CERTIFICATIONS

AWS Academy Data Engineering Badge

Dec 2025

Wipro TalentNext Database Solutions Expert

Oct 2024
