SUMMARY

Aspiring Reporting Analyst with hands-on experience developing, automating, and maintaining recurring and ad-hoc business reports using SQL and Power BI. Skilled in designing accurate, timely reporting structures, validating data quality, and delivering KPI-driven dashboards that support consistent stakeholder decision-making. Experienced in reducing manual reporting effort through automation, ensuring data accuracy across 450K+ records, and improving reporting turnaround time for business stakeholders.

SKILLS

Reporting:	Report Development, Report Automation, Recurring Reporting, Ad-hoc Reporting, Stakeholder Reporting, Turnaround Time Optimization
Business Intelligence:	Power BI, DAX, Dashboard Design, KPI Reporting, Data Visualization
SQL & Databases:	SQL, MySQL, Views, Joins, Relational Databases, Star Schema
Data Quality:	Data Validation, Data Cleaning, Data Accuracy, Quality Assurance, Business Rule Verification
ETL & Data Engineering:	Pentaho Spoon, ETL Pipelines, Data Transformation
Programming:	Python, SQL
Tools:	Microsoft Excel, Git, Jupyter Notebook
Relevant Coursework:	DBMS, Statistics, Machine Learning, Data Structures and Algorithms

EXPERIENCE

Reporting Analyst Intern — Decode Data Academy	<i>July 2025 – Present</i>
- Designed and automated SQL-based recurring reporting workflows, reducing manual reporting effort while improving reporting accuracy and turnaround time for stakeholders. - Performed data validation, quality assurance, and business rule verification throughout the reporting pipeline to ensure consistency, accuracy, and reliability of delivered reports. - Cleaned, transformed, and validated 10,000+ student records using MySQL and advanced SQL queries, eliminating over 95% of inconsistencies to maintain reporting data integrity. - Developed six interactive Power BI dashboards using SQL, DAX, drill-through navigation, and KPI-driven visualizations to deliver recurring reports on student performance, contest participation, and learning outcomes. - Designed normalized relational databases, SQL views, and star-schema data models to support scalable, dependable reporting structures. - Collaborated with stakeholders to gather reporting requirements, define KPIs, and deliver accurate, timely reports supporting data-driven decision making.	

PROJECTS

Student Performance & Contest Analytics Dashboard (<i>Internship</i>) Power BI SQL	Live Dashboard
- Built an end-to-end recurring reporting solution integrating 5+ student datasets using MySQL, SQL, and Power BI to track contest participation, performance trends, rankings, and learning outcomes through automated, KPI-driven reports. - Developed SQL transformations, DAX measures, drill-through reports, and dynamic slicers to automate reporting, reduce manual effort, and improve report accuracy for stakeholder review.	
Flight Data Engineering Pipeline Pentaho Spoon MySQL Power BI	Live Dashboard
- Designed and implemented an end-to-end ETL and reporting pipeline using Pentaho Spoon and MySQL to ingest, cleanse, validate, and transform 445K+ flight records into a report-ready dataset, improving data reliability for business reporting. - Built SQL views, applied star-schema data modeling, and developed interactive Power BI dashboards with KPI reporting to evaluate airline delays, airport performance, carrier efficiency, and operational trends. - Optimized data transformation workflows by integrating ETL processes with SQL-based reporting models, reducing manual reporting effort and improving report turnaround time.	
Banking Risk Analytics & Loan Default Analysis Python Pandas NumPy Matplotlib Seaborn	GitHub
- Conducted exploratory data analysis on banking datasets containing current and historical loan applications by performing data cleaning, missing value treatment, feature engineering, correlation analysis, and customer risk segmentation. - Developed business-driven visualizations and KPIs to analyze loan defaults, repayment behavior, employment stability, income segmentation, EMI burden, and credit affordability, generating actionable reporting insights. - Engineered business-focused analytical features including income segmentation, credit ratio, employment duration groups, and EMI burden metrics to enhance customer risk profiling and reporting accuracy.	

EDUCATION

Bachelor of Technology (B.Tech.) in Artificial Intelligence and Data Science
Lakshmi Narain College of Technology, Bhopal (M.P.)

2022 – 2026

CERTIFICATIONS

AWS Academy Data Engineering Badge

Dec 2025

Wipro TalentNext Database Solutions Expert

Oct 2024
