SUMMARY

Aspiring SQL Developer with hands-on experience in relational database design, query development, and data validation using MySQL and advanced SQL. Skilled in writing optimized queries, views, and joins, designing normalized and star-schema data models, and building automated SQL-based transformation workflows that improve data quality and reporting reliability. Experienced in translating business reporting requirements into efficient, scalable database solutions, with additional exposure to Power BI, DAX, and ETL pipelines for downstream analytics.

SKILLS

SQL:	SQL, MySQL, Joins, Views, CTEs (Common Table Expressions), Stored Procedures, Indexes, Functions, Query Optimization
Database Design:	Database Design, Relational Databases, Normalization, Star Schema, Fact & Dimension Modeling, Data Warehousing
Data Quality:	Data Validation, Data Cleaning, Data Transformation, Business Rule Verification, Data Integrity
ETL & Data Engineering:	Pentaho Spoon, ETL Pipelines, Data Integration
Business Intelligence:	Power BI, DAX, Dashboard Development, KPI Reporting, Data Visualization
Programming:	Python, DAX
Tools:	Microsoft Excel, Git, Jupyter Notebook
Relevant Coursework:	DBMS, Statistics, Machine Learning, Data Structures and Algorithms

EXPERIENCE

SQL Developer Intern — Decode Data Academy	<i>July 2025 – Present</i>
- Designed normalized relational databases, SQL views, and star-schema data models to support scalable, high-performance analytical querying and reporting. - Wrote and optimized advanced SQL queries, joins, and transformations to clean, validate, and process 10,000+ student records, eliminating over 95% of data inconsistencies. - Automated SQL-based data transformation and reporting workflows, reducing manual reporting effort while improving query performance and turnaround time. - Performed data validation, quality assurance, and business rule verification throughout the database and reporting pipeline to ensure consistency and accuracy. - Built SQL queries and DAX measures powering six interactive Power BI dashboards to analyze student performance, contest participation, and learning outcomes. - Collaborated with stakeholders to translate reporting requirements into efficient SQL queries, views, and database structures supporting data-driven decision making.	

PROJECTS

Flight Data Engineering Pipeline Pentaho Spoon MySQL Power BI	 Live Dashboard
- Designed and implemented an end-to-end ETL pipeline using Pentaho Spoon and MySQL to ingest, cleanse, validate, and transform 445K+ flight records into an analytics-ready dataset. - Built SQL views, applied star-schema data modeling, and optimized query structures to support interactive Power BI dashboards evaluating airline delays, airport performance, carrier efficiency, and operational trends. - Optimized data transformation workflows by integrating ETL processes with SQL-based analytical models, improving query performance and dataset readiness for business intelligence reporting.	
Student Performance & Contest Analytics Dashboard (<i>Internship</i>) Power BI SQL	 Live Dashboard
- Built an end-to-end database and reporting solution integrating 5+ student datasets using MySQL and SQL, designing queries and views to support contest participation, performance trends, and rankings analysis. - Developed SQL transformations, DAX measures, drill-through reports, and dynamic slicers to automate reporting, improve query accuracy, and enable stakeholders to monitor performance across multiple dimensions.	
Banking Risk Analytics & Loan Default Analysis Python Pandas NumPy Matplotlib Seaborn	 GitHub
- Conducted exploratory data analysis on banking datasets containing current and historical loan applications by performing data cleaning, missing value treatment, feature engineering, correlation analysis, and customer risk segmentation. - Developed business-driven visualizations and KPIs to analyze loan defaults, repayment behavior, employment stability, income segmentation, EMI burden, and credit affordability, generating actionable insights for credit risk assessment. - Engineered business-focused analytical features including income segmentation, credit ratio, employment duration groups, and EMI burden metrics to enhance customer risk profiling and financial decision-making.	

EDUCATION

Bachelor of Technology (B.Tech.) in Artificial Intelligence and Data Science	
Lakshmi Narain College of Technology, Bhopal (M.P.)	2022 – 2026

CERTIFICATIONS

AWS Academy Data Engineering Badge	Dec 2025
Wipro TalentNext Database Solutions Expert	Oct 2024
