SUMMARY

Aspiring Data Analyst with hands-on experience in SQL, Python, and Power BI, skilled in data cleaning, exploratory data analysis, statistical analysis, and building KPI-driven dashboards that turn 450K+ records into actionable business insights. Proficient in Pandas, NumPy, Matplotlib, and Seaborn for data wrangling and visualization, with additional experience in relational database design, ETL pipelines, and stakeholder reporting. Strong track record of transforming raw, messy datasets into clear, data-driven recommendations for business decision-making.

SKILLS

Programming:	SQL, Python, DAX
Data Analysis:	Exploratory Data Analysis (EDA), Data Cleaning, Data Wrangling, Statistical Analysis, Trend Analysis, Correlation Analysis, Feature Engineering
Visualization & BI:	Power BI, Matplotlib, Seaborn, Dashboard Development, KPI Reporting, Data Visualization, Ad-hoc Reporting
Libraries:	Pandas, NumPy, Matplotlib, Seaborn
Databases:	MySQL, Relational Databases, Star Schema, Fact & Dimension Modeling, Data Warehousing
ETL & Data Engineering:	Pentaho Spoon, ETL Pipelines, Data Transformation, Data Validation
Tools:	Microsoft Excel, Git, Jupyter Notebook
Relevant Coursework:	DBMS, Statistics, Machine Learning, Data Structures and Algorithms

EXPERIENCE

Data Analyst Intern — Decode Data Academy	<i>July 2025 – Present</i>
- Cleaned, transformed, and validated 10,000+ student records using MySQL and advanced SQL queries, improving data quality by eliminating over 95% of inconsistencies to ensure reliable, analysis-ready data. - Performed exploratory data analysis and business rule verification across student datasets to identify trends, anomalies, and quality issues supporting accurate reporting. - Developed six interactive Power BI dashboards using SQL, DAX, drill-through navigation, and KPI-driven visualizations to analyze student performance, contest participation, and learning outcomes. - Designed normalized relational databases, SQL views, and star-schema data models to support scalable analytical querying and reporting. - Automated SQL-based transformation and reporting workflows, reducing manual reporting effort while improving analytical accuracy and turnaround time. - Collaborated with stakeholders to gather reporting requirements, define KPIs, and translate business questions into data-driven dashboards and insights.	

PROJECTS

Banking Risk Analytics & Loan Default Analysis Python Pandas NumPy Matplotlib Seaborn	GitHub
- Conducted exploratory data analysis on banking datasets containing current and historical loan applications by performing data cleaning, missing value treatment, feature engineering, correlation analysis, and customer risk segmentation. - Developed business-driven visualizations and KPIs to analyze loan defaults, repayment behavior, employment stability, income segmentation, EMI burden, and credit affordability, generating actionable insights for credit risk assessment. - Engineered business-focused analytical features including income segmentation, credit ratio, employment duration groups, and EMI burden metrics to enhance customer risk profiling and financial decision-making.	
Flight Data Engineering Pipeline Pentaho Spoon MySQL Power BI	Live Dashboard
- Designed and implemented an end-to-end ETL pipeline using Pentaho Spoon and MySQL to ingest, cleanse, validate, and transform 445K+ flight records into an analytics-ready dataset for business reporting. - Built SQL views, applied star-schema data modeling, and developed interactive Power BI dashboards with KPI reporting and drill-down analysis to evaluate airline delays, airport performance, carrier efficiency, and operational trends. - Optimized data transformation workflows by integrating ETL processes with SQL-based analytical models, improving dataset readiness for business intelligence and dashboard reporting.	
Student Performance & Contest Analytics Dashboard (<i>Internship</i>) Power BI SQL	Live Dashboard
- Built an end-to-end business intelligence solution integrating 5+ student datasets using MySQL, SQL, and Power BI to analyze contest participation, performance trends, rankings, and learning outcomes through KPI-driven dashboards. - Developed SQL transformations, DAX measures, drill-through reports, and dynamic slicers to automate reporting, improve analytical accuracy, and enable stakeholders to monitor performance across multiple dimensions.	

EDUCATION

Bachelor of Technology (B.Tech.) in Artificial Intelligence and Data Science	
Lakshmi Narain College of Technology, Bhopal (M.P.)	2022 – 2026

CERTIFICATIONS

AWS Academy Data Engineering Badge	Dec 2025
Wipro TalentNext Database Solutions Expert	Oct 2024
