SUMMARY

AI Engineer (B.Tech, Artificial Intelligence & Data Science) with hands-on experience in **machine learning, GenAI, RAG, APIs, and deployment**. Pairs AI skills with a strong data-engineering base: SQL, ETL pipelines, feature engineering, and data validation on 500K+ records across banking, aviation, and academic domains. Comfortable taking work from clean data to trained models to API-served applications, and presenting results to non-technical stakeholders.

EXPERIENCE

AI Engineer Intern — Decode Data Academy July 2025 – Present

- Worked end to end on the data lifecycle: ingested, cleaned, and transformed 10,000+ records (5+ branches, 2 colleges) in **MySQL and SQL**, eliminating 95%+ of data errors, and delivered the results as insights.
- Built 10–15 SQL views and 4–5 star-schema fact/dimension tables to support scalable analytics and AI-ready data access.
- Automated processing with a **Pentaho Spoon** ETL layer, improving data-processing efficiency by 20–30% and cutting manual effort.
- Delivered 6 Power BI dashboards (10+ KPI cards) refreshed weekly, turning data into decisions for teachers and administrators.
- As the sole intern in a 6-member analytics team, translated stakeholder requirements into schemas, KPIs, and working data products.
- Verified data quality and business rules across 1,000+ records for consistent, dependable outputs.

PROJECTS

Insurance Incentive Optimization ([GitHub](#), [Live](#)) Python, FastAPI, Scikit-learn

- Built an end-to-end **AI-driven decision system**: a renewal-prediction model (67,875 records) plus an incentive optimizer that recommends the revenue-maximizing agent incentive per policy.
- Exposed it as a deployed **FastAPI** service (Render) with a live web frontend (Vercel), validating input with Pydantic and handling CORS for cross-origin calls.
- Compared Random Forest and XGBoost classifiers inside a scikit-learn Pipeline (imputation, encoding, scaling, engineered **Total_late** feature).

- Built an end-to-end **ML pipeline** on a 55K-row, 122-column loan dataset: missing-value and outlier handling, encoding, and model-ready data preparation.
- Engineered **10+ predictive features** (income segmentation, credit ratio, EMI burden, employment duration) to improve customer risk profiling.
- Trained and compared **Logistic Regression, Decision Tree, and Gradient Boosting** classifiers to predict loan default risk; evaluated with standard classification metrics.

- Built an end-to-end **data pipeline** (Pentaho Spoon, MySQL) processing 445K+ flight records into an analytics-ready fact table (455K rows → 6.5K, ~98% reduction), the kind of feature-ready data layer ML workloads depend on.
- Modeled star-schema tables and SQL views feeding 4 Power BI dashboards on airline delays, airport performance, and carrier efficiency.

EDUCATION

- 2022 - 2026
- Bachelor of Technology (Artificial Intelligence and Data Science) at **Lakshmi Narain College of Technology, Bhopal, Madhya Pradesh, India**
- 2020 - 2021
- Higher Secondary Education (Class XII) at **Manikala Nahar Higher Secondary School**
- 2018 - 2019
- Secondary Education (Class X) at **Shri Maniklal Nahar International School**

TECHNICAL SKILLS

Programming:	Python, SQL
AI & GenAI:	Machine Learning, Generative AI, LLMs, Retrieval-Augmented Generation (RAG)
Machine Learning:	Feature Engineering, Classification (Logistic Regression, Decision Trees, Gradient Boosting), Model Evaluation
APIs & Deployment:	FastAPI, REST APIs, Model Deployment
Libraries:	Pandas, NumPy, Scikit-learn, XGBoost, Matplotlib, Seaborn
Data Engineering:	ETL Pipelines, Pentaho Spoon, Data Validation, Star Schema
Databases:	MySQL, Relational Databases
Tools:	Git, Jupyter Notebook, Power BI
Coursework:	Machine Learning, DBMS, Statistics, Data Structures and Algorithms

CERTIFICATIONS

- AWS Academy Data Engineering Badge

Dec 2025
- Wipro TalentNext Database Solutions Expert

Oct 2024
- HackerRank SQL – 5-Star (Gold) Badge
