SUMMARY

BI Analyst (B.Tech, Artificial Intelligence & Data Science) with hands-on experience in **SQL, Power BI, and Python**. Built 6 interactive Power BI dashboards (10+ KPI cards, SQL and DAX) refreshed weekly for teachers and administrators, designed SQL views and star-schema models for scalable reporting, and cleaned 10,000+ records with 95%+ error reduction. Skilled at gathering requirements, defining KPIs, and delivering reporting that supports data-driven decisions.

EXPERIENCE

BI Analyst Intern — Decode Data Academy

July 2025 – Present

- Built 6 interactive **Power BI dashboards** (10+ KPI cards) with SQL and DAX, refreshed weekly to support data-driven decisions for teachers and administrators.
- Gathered requirements and defined schemas and KPIs within a 6-member analytics team as the sole intern, delivering reporting aligned to stakeholder needs.
- Designed 10–15 SQL views and 4–5 **star-schema** fact/dimension tables to keep reports fast and consistent.
- Cleaned, transformed, and standardized 10,000+ records across 5+ branches and 2 colleges using MySQL and SQL, eliminating 95%+ of data errors before reporting.
- Integrated a Pentaho Spoon ETL layer into SQL reporting workflows, improving data-processing efficiency by 20–30%.
- Verified data quality and business rules across 1,000+ records for consistent KPI outputs.

PROJECTS

Student Analytics Dashboard ([Live](#))

Power BI, SQL, DAX

- Collaborated with a 10-member team to build a BI solution integrating 5+ datasets (1,000+ students, 5+ branches, 2 colleges) via MySQL, SQL, and Power BI.
- Built SQL transformations, **DAX measures**, and 10+ KPI cards with drill-through reports to automate weekly reporting on contests, performance, and rankings.

Flight Data Engineering Pipeline ([GitHub](#))

Pentaho, MySQL, Power BI

- Built SQL views and **star-schema** data models over 445K+ flight records feeding 4 Power BI dashboards on airline delays, airport performance, and carrier efficiency.
- Aggregated 455K raw rows into a 6.5K-row fact table (~98% reduction) via a Pentaho Spoon + MySQL pipeline, significantly improving dashboard query performance.

- Loan Default Risk Prediction (GitHub)

Python, Pandas, Scikit-learn
- Engineered **10+ analytical features** (income segmentation, credit ratio, EMI burden, employment duration) to profile customer risk.
 - Visualized default patterns, repayment behavior, and credit affordability with Matplotlib and Seaborn; extended the analysis with classification models (Logistic Regression, Decision Tree, Gradient Boosting).

EDUCATION

- 2022 - 2026Bachelor of Technology (Artificial Intelligence and Data Science) at **Lakshmi Narain College of Technology, Bhopal, Madhya Pradesh, India**
- 2020 - 2021Higher Secondary Education (Class XII) at **Manikala Nahar Higher Secondary School**
- 2018 - 2019Secondary Education (Class X) at **Shri Maniklal Nahar International School**

TECHNICAL SKILLS

- Business Intelligence:

Power BI, DAX, Dashboard Development, KPI Reporting, Drill-Through Reports, Data Visualization
- Programming:

SQL, Python, DAX
- Data Modeling:

Star Schema, Fact & Dimension Modeling, SQL Views, Normalization
- Data Preparation:

ETL Pipelines, Pentaho Spoon, Data Cleaning, Data Validation
- Libraries:

Pandas, NumPy, Matplotlib, Seaborn
- Databases:

MySQL, Relational Databases
- Tools:

Microsoft Excel, Git, Jupyter Notebook
- Coursework:

DBMS, Statistics, Machine Learning, Data Structures and Algorithms

CERTIFICATIONS

- AWS Academy Data Engineering Badge

Dec 2025
- Wipro TalentNext Database Solutions Expert

Oct 2024
- HackerRank SQL – 5-Star (Gold) Badge
