SUMMARY

Data Analyst (B.Tech, Artificial Intelligence & Data Science) with hands-on experience in **SQL, Python, Power BI, and machine learning**. Built 6 interactive Power BI dashboards (10+ KPI cards) used weekly by teachers and administrators, cleaned and standardized 10,000+ records with 95%+ error reduction, and extended analysis with predictive modeling on a 55K-row loan dataset. Aiming to grow from analytics into data science.

EXPERIENCE

Data Analyst Intern — Decode Data Academy

July 2025 – Present

- Built 6 interactive **Power BI dashboards** (10+ KPI cards) with SQL and DAX, refreshed weekly for teachers and administrators to track student performance.
- Gathered requirements and defined KPIs with a 6-member analytics team as the sole intern, delivering reports aligned to stakeholder needs.
- Wrote SQL queries and 10–15 views and cleaned 10,000+ records across 5+ branches and 2 colleges, eliminating 95%+ of data errors.
- Performed data validation, QA, and business-rule verification across 1,000+ records so reported numbers could be trusted.
- Used a Pentaho Spoon ETL layer to automate recurring data preparation, improving efficiency by 20–30%.

PROJECTS

Student Analytics Dashboard ([Live](#))

Power BI, SQL, DAX

- Collaborated with a 10-member team to build a BI solution integrating 5+ datasets (1,000+ students, 5+ branches, 2 colleges) via MySQL, SQL, and Power BI.
- Built SQL transformations, **DAX measures**, and 10+ KPI cards with drill-through reports to automate weekly reporting on contests, performance, and rankings.

Loan Default Risk Prediction ([GitHub](#))

Python, Pandas, Scikit-learn

- Cleaned and analyzed a 55K-row, 122-column loan dataset with **Python (Pandas, NumPy)**, handling missing values and outliers.
- Engineered **10+ analytical features** (income segmentation, credit ratio, EMI burden, employment duration) to profile customer risk.
- Visualized default patterns, repayment behavior, and credit affordability with Matplotlib and Seaborn; extended the analysis with classification models (Logistic Regression, Decision Tree, Gradient Boosting).

Flight Data Engineering Pipeline ([GitHub](#))Pentaho, MySQL, Power BI

– Built SQL views and **star-schema** data models over 445K+ flight records feeding 4 Power BI dashboards on airline delays, airport performance, and carrier efficiency.

EDUCATION

2022 - 2026Bachelor of Technology (Artificial Intelligence and Data Science) at **Lakshmi Narain College of Technology, Bhopal, Madhya Pradesh, India**

2020 - 2021Higher Secondary Education (Class XII) at **Manikala Nahar Higher Secondary School**

2018 - 2019Secondary Education (Class X) at **Shri Maniklal Nahar International School**

TECHNICAL SKILLS

Programming:

Business Intelligence:

Analysis:

Machine Learning:

Libraries:

Databases:

Tools:

Coursework:

SQL, Python, DAX
Power BI, Dashboard Development, KPI Reporting, Drill-Through Reports, Data Visualization
Exploratory Data Analysis, Data Cleaning, Data Validation, Statistics
Feature Engineering, Classification (Logistic Regression, Decision Trees, Gradient Boosting), Model Evaluation
Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
MySQL, Relational Databases, Star Schema, SQL Views
Microsoft Excel, Git, Jupyter Notebook
Machine Learning, DBMS, Statistics, Data Structures and Algorithms

CERTIFICATIONS

– AWS Academy Data Engineering BadgeDec 2025

– Wipro TalentNext Database Solutions ExpertOct 2024

– HackerRank SQL – 5-Star (Gold) Badge
