SUMMARY

Data Engineer (B.Tech, Artificial Intelligence & Data Science) with an **AWS Academy Data Engineering** badge and hands-on experience building end-to-end **ETL pipelines**, relational and star-schema data models, and Python-based data workflows on 500K+ records across banking, aviation, and academic domains. Strong SQL and data-warehousing foundation; comfortable with APIs, batch processing, data validation, and delivering pipeline outputs to BI and ML consumers. Currently upskilling in PySpark and Databricks.

EXPERIENCE

Data Engineer Intern — Decode Data Academy July 2025 – Present

- Designed and engineered **ETL data pipeline** workflows using MySQL and SQL to ingest, clean, transform, and standardize 10,000+ student records across 5+ branches and 2 colleges, eliminating 95%+ of data errors.
- Designed normalized relational databases, 10–15 SQL views, and 4–5 **star-schema** fact/dimension tables to support scalable downstream reporting and analytics.
- Deployed a **Pentaho Spoon** ETL layer into existing SQL reporting workflows, improving data-processing efficiency by 20–30% and reducing manual pipeline maintenance.
- Performed data validation, QA, and business-rule verification across 1,000+ records for consistent, pipeline-ready outputs.
- Served pipeline outputs to 6 Power BI dashboards (10+ KPI cards), refreshed weekly.
- Collaborated within a 6-member analytics team as the sole intern, defining schemas and delivering pipeline-backed reporting.

PROJECTS

Flight Data Engineering Pipeline ([GitHub](#)) Pentaho, MySQL, Power BI

- Designed and built an end-to-end **ETL pipeline** (Pentaho Spoon, MySQL) processing 445K+ raw flight records (375K+ flights, 283 cities, 3,663 routes) in a 4–5 minute run.
- Aggregated 455K raw rows into a 6.5K-row analytics-ready fact table (~98% data reduction), significantly boosting downstream query and dashboard performance.
- Built SQL views and **star-schema** data models feeding 4 Power BI dashboards on airline delays, airport performance, and carrier efficiency.

- Cab & Auto Fare Prediction (GitHub)Python, PyTorch, Pandas
- Consolidated **7 independently collected ride datasets** (465K+ raw records) into one standardized schema using Python and Pandas; reproducible via separate Kaggle-API ingestion, merging, and preprocessing notebooks.

– Removed 1,270 rate-card rows and 7,329 duplicates, unified 11 overlapping payment labels into 4, parsed mixed date formats, imputed missing values with flags, and encoded ~12.8K-cardinality locations as log-frequency features; asserted no NaN/inf in the final 376K-row table.

- Student Analytics Dashboard (Live)Power BI, SQL, DAX
- Integrated 5+ datasets (1,000+ students, 5+ branches, 2 colleges) via MySQL, SQL, and Power BI; built DAX measures and 10+ KPI cards with drill-through reports for automated weekly reporting.

EDUCATION

- 2022 - 2026 Bachelor of Technology (Artificial Intelligence and Data Science) at **Lakshmi Narain College of Technology, Bhopal, Madhya Pradesh, India**
- 2020 - 2021 Higher Secondary Education (Class XII) at **Manikala Nahar Higher Secondary School**
- 2018 - 2019 Secondary Education (Class X) at **Shri Maniklal Nahar International School**

TECHNICAL SKILLS

- Programming:

Data Engineering:

Data Modeling:

Machine Learning:

Databases:

Business Intelligence:

Libraries:

Tools:

Currently Upskilling:
- Python, SQL, DAX

ETL Pipelines, Pentaho Spoon, Data Pipeline Development, Batch Processing, Data Integration, Data Transformation, Data Validation, Data Warehousing, APIs

Star Schema, Fact & Dimension Modeling, Relational Database Design, Normalization

Feature Engineering, Classification (Logistic Regression, Decision Trees, Gradient Boosting)

MySQL, Relational Databases

Power BI, Dashboard Development, KPI Reporting

Pandas, NumPy, Scikit-learn, PyTorch

Microsoft Excel, Git, Jupyter Notebook

PySpark, Databricks

CERTIFICATIONS

- AWS Academy Data Engineering Badge

– Wipro TalentNext Database Solutions Expert

– HackerRank SQL – 5-Star (Gold) Badge
- Dec 2025

Oct 2024
