SUMMARY

Data Scientist (B.Tech, Artificial Intelligence & Data Science) with hands-on experience in **Python, SQL, machine learning, statistics, and Power BI**. Experienced in EDA, feature engineering, and classification modeling (Logistic Regression, Decision Trees, Gradient Boosting) on a 55K-row banking dataset, plus building ETL pipelines and BI dashboards over 500K+ records. Skilled at turning raw data into predictive models and clear, actionable insights for stakeholders.

EXPERIENCE

Data Scientist Intern — Decode Data Academy July 2025 – Present

- Cleaned, transformed, and standardized 10,000+ records across 5+ branches and 2 colleges using MySQL and SQL, eliminating 95%+ of data errors and preparing **analysis-ready datasets**.
- Defined KPIs and gathered requirements within a 6-member analytics team as the sole intern, turning raw data into decision-ready metrics.
- Built 6 interactive **Power BI dashboards** (10+ KPI cards) using SQL and DAX to track performance metrics and trends, refreshed weekly for teachers and administrators.
- Designed 10–15 SQL views and 4–5 star-schema tables for fast, flexible analysis.
- Performed data validation, QA, and business-rule verification across 1,000+ records to ensure reliable analytical outputs.

PROJECTS

Insurance Incentive Optimization ([GitHub](#), [Live](#)) Python, FastAPI, Scikit-learn

- Predicted **policy renewal probability** on 67,875 policyholder records (imputation, one-hot/target encoding, scaling, engineered `TotalLate` feature); compared Random Forest and XGBoost classifiers.
- Turned model probabilities into a business decision: searched agent incentives (Rs. 500–4,500) per policy to maximize expected net revenue using a diminishing-returns effort model.
- Shipped the model as a live **FastAPI** service (Render) with a web frontend (Vercel) so non-technical users can get recommendations.

Loan Default Risk Prediction ([GitHub](#)) Python, Pandas, Scikit-learn

- Performed **EDA and statistical analysis** on a 55K-row, 122-column loan dataset, handling missing values and outliers to prepare model-ready data.
- Engineered **10+ predictive features** (income segmentation, credit ratio, EMI burden, employment duration) for customer risk profiling.
- Built and compared **Logistic Regression, Decision Tree, and Gradient Boosting** models to predict loan default risk; evaluated model performance.

- Merged and standardized **7 heterogeneous ride datasets** (465K+ raw records) into one schema; removed rate-card rows and 7K+ duplicates, leaving 376K clean rows.
- Engineered cyclic time features and location-frequency encodings (~12.8K locations); **identified target leakage** (weather, ratings, zero-distance cancellations) and removed it before modeling.
- Ran a leakage-free evaluation (train-only statistics, 70/15/15 split) comparing mean-per-source and HistGradientBoosting baselines against PyTorch embedding MLPs, with per-source error analysis.

EDUCATION

- 2022 - 2026 Bachelor of Technology (Artificial Intelligence and Data Science) at **Lakshmi Narain College of Technology, Bhopal, Madhya Pradesh, India**
- 2020 - 2021 Higher Secondary Education (Class XII) at **Manikala Nahar Higher Secondary School**
- 2018 - 2019 Secondary Education (Class X) at **Shri Maniklal Nahar International School**

TECHNICAL SKILLS

Programming:	Python, SQL, DAX
Machine Learning:	Predictive Modeling, Feature Engineering, Classification (Logistic Regression, Decision Trees, Gradient Boosting), Model Evaluation, Deep Learning
Statistics & Analysis:	Statistics, Exploratory Data Analysis, Data Cleaning, Hypothesis-Driven Analysis
Business Intelligence:	Power BI, Dashboard Development, KPI Reporting, Data Visualization
Libraries:	Pandas, NumPy, Scikit-learn, XGBoost, PyTorch, Matplotlib, Seaborn
Databases:	MySQL, Relational Databases, Star Schema
Tools:	Microsoft Excel, Git, Jupyter Notebook, FastAPI
Coursework:	Machine Learning, DBMS, Statistics, Data Structures and Algorithms

CERTIFICATIONS

- AWS Academy Data Engineering Badge

Dec 2025
- Wipro TalentNext Database Solutions Expert

Oct 2024
- HackerRank SQL – 5-Star (Gold) Badge
