SUMMARY

BI Analyst (B.Tech, Artificial Intelligence & Data Science) with hands-on experience in **SQL, Power BI, and Python**. Built 6 interactive Power BI dashboards (10+ KPI cards, SQL and DAX) refreshed weekly for teachers and administrators, designed SQL views and star-schema models for scalable reporting, and cleaned 10,000+ records with 95%+ error reduction. Skilled at gathering requirements, defining KPIs, and delivering reporting that supports data-driven decisions.

EXPERIENCE

Data Analytics Intern — Decode Data Academy July 2025 – Present

- Built 6 interactive **Power BI dashboards** (10+ KPI cards) with SQL and DAX for teachers and administrators, refreshed weekly to support data-driven decisions.
- Cleaned, transformed, and standardized 10,000+ student records across 5+ branches and 2 colleges using MySQL and SQL, eliminating 95%+ of data errors.
- Designed normalized relational databases, 10–15 SQL views, and 4–5 star-schema fact/dimension tables to support high-performance reporting.
- Gathered requirements and defined schemas/KPIs within a 6-member analytics team as the sole intern, delivering reporting aligned to stakeholder needs.
- Integrated a Pentaho Spoon ETL layer into existing SQL reporting workflows, improving data-processing efficiency by 20–30%.
- Performed data validation, QA, and business-rule verification across 1,000+ records for consistent analytical outputs.

PROJECTS

Student Performance & Contest Analytics Dashboard *(Internship)* Live Dashboard

Power BI, SQL, DAX, MySQL

- Collaborated with a 10-member team to build a BI solution integrating 5+ datasets (1,000+ students, 5+ branches, 2 colleges) via MySQL, SQL, and Power BI.
- Built SQL transformations, **DAX measures**, and 10+ KPI cards with drill-through reports to automate weekly reporting on contests, performance, and rankings.

Flight Data Engineering Pipeline GitHub

Pentaho Spoon, MySQL, Power BI

- Built SQL views and **star-schema** data models over 445K+ flight records feeding 4 Power BI dashboards on airline delays, airport performance, and carrier efficiency.
- Aggregated 455K raw rows into a 6.5K-row fact table (~98% reduction) via a Pentaho Spoon + MySQL pipeline, significantly improving dashboard query performance.

Loan Default Risk Prediction & Feature Engineering *(Self-Directed)* GitHub

Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

- Engineered **10+ analytical features** (income segmentation, credit ratio, EMI burden, employment duration) to profile customer risk.
- Visualized default patterns, repayment behavior, and credit affordability with Matplotlib and Seaborn; extended the analysis with classification models (Logistic Regression, Decision Tree, Gradient Boosting).

EDUCATION

2022 - 2026 Bachelor of Technology (Artificial Intelligence and Data Science) at **Lakshmi Narain College of Technology, Bhopal, Madhya Pradesh, India**

TECHNICAL SKILLS

Business Intelligence:	Power BI, DAX, Dashboard Development, KPI Reporting, Drill-Through Reports, Data Visualization
Programming:	SQL, Python, DAX
Data Modeling:	Star Schema, Fact & Dimension Modeling, SQL Views, Normalization
Data Preparation:	ETL Pipelines, Pentaho Spoon, Data Cleaning, Data Validation
Libraries:	Pandas, NumPy, Matplotlib, Seaborn
Databases:	MySQL, Relational Databases
Tools:	Microsoft Excel, Git, Jupyter Notebook
Coursework:	DBMS, Statistics, Machine Learning, Data Structures and Algorithms
