SUMMARY

Data Analyst (B.Tech, Artificial Intelligence & Data Science) with hands-on experience in **SQL, Python, Power BI, and machine learning**. Built 6 interactive Power BI dashboards (10+ KPI cards) used weekly by teachers and administrators, cleaned and standardized 10,000+ records with 95%+ error reduction, and extended analysis with predictive modeling on a 55K-row loan dataset. Aiming to grow from analytics into data science.

EXPERIENCE

- Data Analytics Intern — Decode Data Academy** July 2025 – Present
- Built 6 interactive **Power BI dashboards** (10+ KPI cards) with SQL and DAX for teachers and administrators, refreshed weekly to support data-driven decisions.
 - Cleaned, transformed, and standardized 10,000+ student records across 5+ branches and 2 colleges using MySQL and SQL, eliminating 95%+ of data errors.
 - Designed normalized relational databases, 10–15 SQL views, and 4–5 star-schema fact/dimension tables to support high-performance reporting.
 - Gathered requirements and defined schemas/KPIs within a 6-member analytics team as the sole intern, delivering reporting aligned to stakeholder needs.
 - Integrated a Pentaho Spoon ETL layer into existing SQL reporting workflows, improving data-processing efficiency by 20–30%.
 - Performed data validation, QA, and business-rule verification across 1,000+ records for consistent analytical outputs.

PROJECTS

- Student Performance & Contest Analytics Dashboard** (*Internship*) Live Dashboard
- Power BI, SQL, DAX, MySQL*
- Collaborated with a 10-member team to build a BI solution integrating 5+ datasets (1,000+ students, 5+ branches, 2 colleges) via MySQL, SQL, and Power BI.
 - Built SQL transformations, **DAX measures**, and 10+ KPI cards with drill-through reports to automate weekly reporting on contests, performance, and rankings.
- Loan Default Risk Prediction & Feature Engineering** (*Self-Directed*) GitHub
- Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn*
- Cleaned and analyzed a 55K-row, 122-column loan dataset with **Python (Pandas, NumPy)**, handling missing values and outliers.
 - Engineered **10+ analytical features** (income segmentation, credit ratio, EMI burden, employment duration) to profile customer risk.
 - Visualized default patterns, repayment behavior, and credit affordability with Matplotlib and Seaborn; extended the analysis with classification models (Logistic Regression, Decision Tree, Gradient Boosting).
- Flight Data Engineering Pipeline** GitHub
- Pentaho Spoon, MySQL, Power BI*
- Built SQL views and **star-schema** data models over 445K+ flight records feeding 4 Power BI dashboards on airline delays, airport performance, and carrier efficiency.

EDUCATION

2022 - 2026 Bachelor of Technology (Artificial Intelligence and Data Science) at **Lakshmi Narain College of Technology, Bhopal, Madhya Pradesh, India**

TECHNICAL SKILLS

- | | |
|-------------------------------|--|
| Programming: | SQL, Python, DAX |
| Business Intelligence: | Power BI, Dashboard Development, KPI Reporting, Drill-Through Reports, Data Visualization |
| Analysis: | Exploratory Data Analysis, Data Cleaning, Data Validation, Statistics |
| Machine Learning: | Feature Engineering, Classification (Logistic Regression, Decision Trees, Gradient Boosting), Model Evaluation |
| Libraries: | Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn |
| Databases: | MySQL, Relational Databases, Star Schema, SQL Views |
| Tools: | Microsoft Excel, Git, Jupyter Notebook |
| Coursework: | Machine Learning, DBMS, Statistics, Data Structures and Algorithms |

CERTIFICATIONS

- | | |
|--|----------|
| – AWS Academy Data Engineering Badge | Dec 2025 |
| – Wipro TalentNext Database Solutions Expert | Oct 2024 |
| – HackerRank SQL – 5-Star (Gold) Badge | |
