SUMMARY

Data Scientist (B.Tech, Artificial Intelligence & Data Science) with hands-on experience in **Python, SQL, machine learning, statistics, and Power BI**. Experienced in EDA, feature engineering, and classification modeling (Logistic Regression, Decision Trees, Gradient Boosting) on a 55K-row banking dataset, plus building ETL pipelines and BI dashboards over 500K+ records. Skilled at turning raw data into predictive models and clear, actionable insights for stakeholders.

EXPERIENCE

Data Analytics Intern — Decode Data Academy July 2025 – Present

- Cleaned, transformed, and standardized 10,000+ student records across 5+ branches and 2 colleges using MySQL and SQL, eliminating 95%+ of data errors and preparing analysis-ready datasets.
- Designed normalized relational databases, 10–15 SQL views, and 4–5 star-schema tables for scalable, high-performance analytics.
- Built 6 interactive **Power BI dashboards** (10+ KPI cards) with SQL and DAX, tracking performance metrics and trends for teachers and administrators with weekly refreshes.
- Defined KPIs and gathered requirements within a 6-member analytics team as the sole intern, turning data into decisions for stakeholders.
- Integrated a Pentaho Spoon ETL layer into SQL reporting workflows, improving data-processing efficiency by 20–30%.
- Performed data validation, QA, and business-rule verification across 1,000+ records to ensure consistent, reliable analytical outputs.

PROJECTS

Loan Default Risk Prediction & Feature Engineering (*Self-Directed*) GitHub

Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

- Performed **EDA and statistical analysis** on a 55K-row, 122-column loan dataset, handling missing values and outliers to prepare model-ready data.
- Engineered **10+ predictive features** (income segmentation, credit ratio, EMI burden, employment duration) for customer risk profiling.
- Built and compared **Logistic Regression, Decision Tree, and Gradient Boosting** models to predict loan default risk; evaluated model performance.
- Communicated findings through KPI visualizations on default patterns, repayment behavior, and credit affordability for actionable risk insights.

Student Performance & Contest Analytics Dashboard (*Internship*) Live Dashboard

Power BI, SQL, DAX, MySQL

- Integrated 5+ datasets (1,000+ students, 5+ branches, 2 colleges) via MySQL, SQL, and Power BI; built DAX measures and 10+ KPI cards with drill-through reports for automated weekly reporting.

Flight Data Engineering Pipeline GitHub

Pentaho Spoon, MySQL, Power BI

- Built SQL views and **star-schema** data models over 445K+ flight records feeding 4 Power BI dashboards on airline delays, airport performance, and carrier efficiency.

EDUCATION

2022 - 2026 Bachelor of Technology (Artificial Intelligence and Data Science) at **Lakshmi Narain College of Technology, Bhopal, Madhya Pradesh, India**

TECHNICAL SKILLS

Programming:	Python, SQL, DAX
Machine Learning:	Predictive Modeling, Feature Engineering, Classification (Logistic Regression, Decision Trees, Gradient Boosting), Model Evaluation, Deep Learning
Statistics & Analysis:	Statistics, Exploratory Data Analysis, Data Cleaning, Hypothesis-Driven Analysis
Business Intelligence:	Power BI, Dashboard Development, KPI Reporting, Data Visualization
Libraries:	Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
Databases:	MySQL, Relational Databases, Star Schema
Tools:	Microsoft Excel, Git, Jupyter Notebook
Coursework:	Machine Learning, DBMS, Statistics, Data Structures and Algorithms
